Non-Vaccinate Cows

The females selling will be official calfhooed vaccinates except for Lots 17, 21, 22, 35, 42, 137, 145, 146 & 152, who are designated as non-vaccinates on this supplement sheet.

Non-vaccinates are not eligible to be shipped to the following states: California, Colorado, Idaho, Louisiana, Montana, Nevada, North Dakota, Oregon, Pennsylvania, Utah, Washington, West Virginia, Wisconsin and Wyoming.

Pregnancy Guarantee

All females selling as safe in calf are guaranteed to be pregnant at the time of the sale. They have been pregnancy checked by ultrasound so that we can give the most up-to-date information on the cows selling. We have given the comments of the Vet. We cannot guarantee the service that he calls, but do guarantee the animal to be safe in calf to one of the services mentioned in the catalog or on this supplement sheet if she is listed as safe on the supplement sheet. See page 72 of sale catalog for complete terms.

Terms of Sale for Frozen Embryos

All frozen embryos sell Friday night during the pre-sale party. All the embryos are Direct Thaw. Due to the uncertain viability and different procedures by technicians, Star Lake cannot guarantee a pregnancy or a live embryo at the time of thawing. Star Lake will guarantee the buyer will find the number of embryo(s) sold per lot or straw. Star Lake will furnish the proper documents to register the resulting calves, with the exception of A.I. certificates for sires that Star Lake does not own. It will be the buyer's responsibility to furnish the A.I. certificate for embryos that are sired by bulls not owned by Star Lake at time of conception. There will be no need for A.I. certificates for embryos sired by bulls in the Star Lake Herd Bull Battery. It is the buyer's responsibility to pay all freight or shipping charges to receive embryos purchased. Standard shipping cost is \$85. Overnight shipping cost is a total of \$165.

Star Lake will have recipients ready to be implanted June 1st on an off-farm facility. We can implant a limited number of embryos purchased in this sale and send the resulting pregnancies to the buyer for \$1,800 per 60-day pregnant recipient (in addition to the cost of purchasing the embryos), not including delivery expense of the recipient. Requests for implantation will be honored in the order received, and buyers need to ask to be added to the implant list. Star Lake cannot guarantee a pregnancy rate for these implanted embryos. If the buyer does not get any pregnancies, there will be no charges for the recipient, although the purchase price of the frozen embryos is non-refundable.
